ABSTRACT

This 1982-83 statistical survey of libraries at four-year colleges and universities, two-year colleges, law libraries and miscellaneous academic institutions in the Pacific Northwest provides relevant data for comparison and inventory purposes. A total of 129 institutions responded to the questionnaire which was administered by the Pacific Northwest Library Association (PNLA). Data tables, divided by type of institution, include but are not limited to the following topics: (1) rank by collection size; (2) volumes held as of June 1983; (3) volumes per full time student; (4) growth rate; (5) total microform units; (6) audiovisual units (broken into categories); (7) government documents; (8) number of items borrowed; (9) current serials; (10) total library operating expense; (11) professional staff; (12) non-professional, non-student staff; (13) number of male/female professional staff; and (14) number of hours in professional work week. Appendices include average beginning librarian salaries; average salaries of library directors; number of male and female professionals; survey instrument and explanatory document; and an index to respondents. INTRODUCTION

The intent of the Pacific Northwest Library Association's survey of northwest academic libraries is to make available in one place relevant data for comparison and inventory purposes. In order to also make it possible for readers to detect any patterns of change between one survey and the next, this compilation has been formatted in a similar manner to its predecessor. However, there are a few differences that require explanations:

1. The previous pattern of listing institutions in the rows and their data in the columns has been reversed in this report so that all data for any library appears complete on one page. Hopefully this will facilitate the study of any particular institution's data.

2. Law library figures which were reported apart from the main library's statistics have been presented in a separate table.

3. A few new categories of data have been collected as a result of suggestions from libraries that participated in the previous survey. These categories include salaries of library directors and beginning librarians, audio-visual holdings, and government document holdings.

4. Institutions were asked to indicate whether their reported figures were based on physical or bibliographical counts. Fifty-four libraries reported bibliographical totals, sixty-nine reported physical counts, and six made no indication as to which type of figure was used. Despite the fact that bibliographical and physical volume counts are not directly comparable, in order to be consistent with the previous survey the institutions are again listed in order of the reported total volumes held. Readers are warned to take into account these different types of totals when comparing libraries. The kind of count reported is indicated in the footnote section of each institution. The lack of such an indication means that the library did not report which kind of count was used.

A total of 129 institutions responded to the survey, whereas 141 participated in the previous compilation. The decrease was evenly distributed between 2 year colleges on the one hand and 4 year colleges and universities on the other.

For those who would like to perform their own data analysis using a computer, the figures contained herein may also be obtained on a floppy disk. Contact the editor for further information. A modest fee will be charged, payable to PNLA.

PNLA ACADEMIC LIBRARY SURVEY 1982-83

Instructions for Completion of the Questionnaire

GENERAL

1. Definitions of the statistical categories used in this questionnaire can be found in Library Statistics: A Handbook of Concepts, Definitions and Terminology (Chicago: American Library Association, 1977).

2. Round figures to the dollar.

3. In a university which includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The National Center for Education Statistics in its Higher Education General Information Survey describes a branch campus as one "located in a community different from that in which its parent institution is located...beyond a reasonable commuting distance from the main campus..."). If figures for libraries located on branch campuses are reported, please provide an explanatory footnote.

COLLECTIONS

Questions 1-5. Use the ALA definition for "Volume" as noted in instruction 1 above. Include duplicates and bound volumes of periodicals. PERSONNEL

Questions 11-19. Report the number of staff in filled positions, or positions which are only temporarily vacant. Include staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. It is preferred that the number of FTE staff be determined on the basis of the length of the work week in the reporting library.

Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians.

EXPENDITURES

Questions 22-24. Report all expenditures, regardless of whether the funds come from the regular library budget or from special funds, such as research grants. When special project or grant funds are included, please provide a footnote indicating the amount of such funds. Include federal funds for work study students.

For serials subscription costs (#22) include all monies spent on items included in question 6.

ENROLLMENT

Question 28. Please use figures reported to the U.S. Department of Education on the form entitled "Higher Education General Information Survey, Fall Enrollment in Institutions of Higher Education," or other official indicator.
